Calpendo

An Intelligent, Next-Generation Core Facility Management System

The Calpendo Solution For Core Facility Management

Calpendo is consistently recognised as the best-in-class management system by providing a solution that is easy to use with powerful, intelligent and configurable controls.

Calpendo can automate virtually all functions and processes. As an example, together with resource usage tracking, Calpendo is able to automate bespoke reports that compare booked and actual usage. This provides valuable information for billing and usage management purposes.

The unlimited flexibility that Calpendo provides means that when a Calpendo system is set up, it is done to meet the exact needs and requirements of the customer and their core facility. It is this that makes Calpendo the number one choice for facilities all across the world.

Calpendo Features Include:

Billing & Invoicing • **Actual Usage Tracking** • **Data Management**

Reporting • **Inventory Management** • **Automation & Workflows**

Email Capabilities • **iCal Export** • **LDAP/SSO Compatibility**

Unlimited Configuration Options • **Unlimited Support**
